Unified Communications

Unified Communications and Collaboration for Desktop & Mobile

OVERVIEW: DCWIRENET UC

Frost & Sullivan predicts that the U.S. mobile worker population will increase to 79.3 million in 2024*.

With more and more moving to remote workforces and "Bring-Your-Own-Device" (BYOD) environments, the need for more effective communication and collaboration is more important than ever. You need comprehensive tools that allow you stay connected to the business from anywhere, any time, and virtually any device.

Dcwirenet UC is a Unified Communications solution that combines calling, chat, meetings, voicemail, video, screen sharing and enterprise contacts into a single, easy-to-use interface to improve everyday communications and collaboration for businesses.

*Growth Opportunities in the North American Hosted IP Telephony and UCaaS Market, Forecast to 2024

What UC does:

UC makes your communication simpler and your collaboration more productive. It provides you with audio and video calling, instant messaging, meetings/video chat, history, and voicemail without switching between devices, apps, and screens. Dcwirenet UC allows you to make and take calls without being tied to your desk phone, to chat (one-to-one or one-to-many), and meet with or see each other's faces with the click of a button—all this without using multiple tools or programs. Any business with modern communications needs can benefit from UC, from highly virtualized organizations, companies with multiple locations, to those with remote or mobile workers. Dcwirenet UC empowers businesses by making it easy, pleasant and efficient for them to communicate how they want and where they want.

Why should you use Dcwirenet UC?

For any business to be successful, its employees need to be able to communicate. More than that, they need to do so simply and efficiently. Clunky communication wastes time, results in duplication of effort, frustrates people, and lows down the entire business. UC removes the frustration from using multiple programs of communication and collaboration. It simplifies the day-today tasks and operations organizations rely on for their success. Designed to enhance the end user's experience by eliminating communication inefficiencies, Dcwirenet clears roadblocks that slow down a business and enables all users within an organization to perform as high functioning team members.

You'll be able to leverage powerful features and benefits including:

- **Calling** - Your employees can make and take calls right from the UC interface unless your business requires them, there is no need to spend money or time on installing desk phones

- **Voicemail** - View and manage your voicemails from a single screen as well as view message transcriptions (with a transcription service)

- **Enterprise Contacts** - Access all of your enterprise contacts automatically, and add, edit, or delete contacts

- **Meetings / Video** - Schedule, manage, and conduct video meetings where participants can share screens and control meeting settings all from within UC

- **Chat** - Chat with other members of your organization with the click of a button

- **History** - See all of your activity across calls, chats, and meetings over the previous 30 days

With businesses moving to remote workforces & "Bring-Your-Own-Device" (BYOD) environments, the need for more effective communication and collaboration is more important than ever.
